Network Keyboard PTZKB836 Quick Operation Guide

Preventive and Cautionary Tips

Before connecting and operating your keyboard, please be advised of the following tips:

- Ensure unit is placed in a well-ventilated, dust-free environment.
- Keep all liquids away from the keyboard.
- Please check the power supply to avoid the damage caused by voltage mismatch.
- Please make sure the keyboard work in the allowed range of temperature and humidity.
- Please keep the device horizontal and avoid the installation under severe vibration environment.
- The dust board will cause a short circuit after damping; Please use the brush to dedust regularly for the board, connector, chassis fan, etc.
- Improper use or replacement of the battery may result in hazard of explosion. Replace with the same or equivalent type only. Dispose of used batteries according to the instructions provided by the battery manufacturer.

Chapter 2 Quick Configuration Guide

Steps:

1. When the keyboard has started up, it enters the following interface:

2. For basic keyboard operation, select the Keyboard icon to continue and enter the login interface.

User Lo	ogin	
User Name Password	admin *****	
Remember Password	~	
Login	Exit	

3. Select **admin** on the login interface and then input the admin password (default: 12345) to enter the admin interface of keyboard operation.

Click Keyboard > Network to enter the Network Settings interface.
 Configure the network settings of the keyboard, including the Port, IP address, Subnet Mask, Default Gateway, Primary DNS and Secondary DNS. Click Apply to save the settings.

	Keyboard Network Settings						
Version	DHCP:

3.1 Local Live View

The local live view refers to display the video signal from the input channel through the network keyboard. Currently, only the 1-window display mode for 1 decoding channel is supported. In the preview mode, you can operate other shortcut functions.

Steps:

- 1. Press the 0+MON keys to enter local live view.
- 2. Press the Num + CAM keys to select the camera input for display on the screen.

Note: In the local operation status, it is unallowable to operate the window (WIN), camera group (CAM-G), multi-division display (MULT) and camera tour (TOUR) functions.

3. Press the ESC key on the keyboard to enter full-screen preview mode.

Notes:

- Up to 1080P resolution is supported for local live view.
- You can press the 0+CAM keys to stop the dynamic decoding of the current window.

3.2 Display of Decoded Video on Monitor

3.2.1 Setting Multi-division Display

You can select different multi-division display modes for the selected output channel. Currently, 1/4/9/16-division display modes are configurable.

Steps:

- 1. Press the *Num + MON* keys to select the monitor.
- 2. Press the Num + MULT keys to select the multi-division display mode for the output channel.

Notes:

- In the local live view mode when you input 0+MON keys, the multi-division display mode is not supported.
- Corresponding error message will appear on the screen when user performs wrong operation. E.g., when the multi-division number entered is not supported by the current output monitor, the message "wrong operation" will appear.

3.2.2 Displaying Decoded Video on Monitor

The selected input signal can be outputted and displayed by the decoding channel on the monitor. Currently, the supported decoding resolution includes: QCIF, CIF, DCIF, 2CIF, 4CIF, 720p, 1080p, VGA, UXGA, etc. The output interface can be selected to BNC/VGA/HDMI/DVI.

Steps:

- 1. Press the Num + MON keys to select the monitor.
- Press the Num + WIN keys to select the display window on the monitor.
 You can also directly touch the screen to select the display window.
- 3. Press the Num + CAM keys to select the input camera.

Example:

You can input the "1+MON, 2+WIN, 3+CAM" keys to decode the video signal from camera 3 and display it on window 2 of monitor 1.

When you press the 0+CAM keys, it will stop the dynamic decoding of the current window. If no display window is selected, the decoding of the 1^{st} window will be stopped by default.

Description of icons:

Switch to full screen of sub screen	Restore	Audio off	Audio on

Note: Corresponding error message will appear on the screen when you perform wrong operation.

3.3 PTZ Control

If the camera connected to the keyboard supports PTZ function, you are allowed to operate the LIGHT/FOCUS/IRIS/ZOOM/WIPER buttons and joystick to realize PTZ control in the live view mode of the decoded video.

Two operation methods can be used to realize PTZ control:

Method 1:

1. Press the Num + MON keys to select the monitor.

2. Press the Num + WIN keys to select the display window.

Note: When the current window is in cycle view mode, the keyboard will be unable to automatically connect with the camera and now it is invalid to operate the joystick.

Method 2:

- 1. Press the Num + CAM keys to directly select the camera.
- When the camera connected to the keyboard supports PTZ function, operate the joystick and LIGHT/WIPER/FOCUS±/IRIS±/ZOOM buttons to realize PTZ control.

When the purpose of AUX1/AUX2 key has been set to **PTZ Speed**, you can use the key to adjust the PTZ control speed.

3.4 Playback

3.4.1 Local Playback

The video files stored in the encoding device can be played back through the related decoder. Three playback modes are available: playback by USB file, playback by time and playback by file.

Click Playback on the main interface to enter the Local Playback interface.

	Local Playback
