

Protect production while protecting the perimeters.

Pro-intelligence. Pro-detection. Pro-active. That's Pro-X

To protect organics, **Pro-X 12 MP** cameras emit IR light only when needed via manual or automated switching. And MD 2.0 & Color 24/7 add security that meets or exceeds requirements.

Pro-X 5K fisheye & 4-lens models monitor much more ground with fewer cameras.
